

## PGY1 Equivalent Experience Review Process

If an individual has not completed a Postgraduate Year One (PGY1) pharmacy residency and wants to be considered to be eligible for a PGY2 pharmacy residency position: ASHP must clear the individual with the National Matching Service (NMS) to state they meet the intent of equivalent experience to be eligible for a PGY2 pharmacy residency.

To be considered for PGY1 equivalent experience the individual must have practiced at least THREE years as a PHARMACIST and must be licensed to practice as a pharmacist in the US. If this is the case, please have the individual electronically send the following information to Janet Teeters, Director of Accreditation Services at ASHP at [jteeters@ashp.org](mailto:jteeters@ashp.org).

- CV (curriculum vitae)
- Contact information email and phone
- PGY2 pharmacy residency program they wish to pursue
- A written document that addresses how their experience meets the following required outcomes and each goal per outcome (required of all individuals that complete a PGY1 pharmacy residency). Please describe the activities, projects, services provided or information that shows you meet the following goals under each of the required 6 outcomes.

### PGY1 Pharmacy Residency Required Educational Outcomes and Goals

**For more detailed information about outcomes, goals, objectives and instructional objectives see:**

#### PGY1 Outcomes, Goals, and Objectives

---

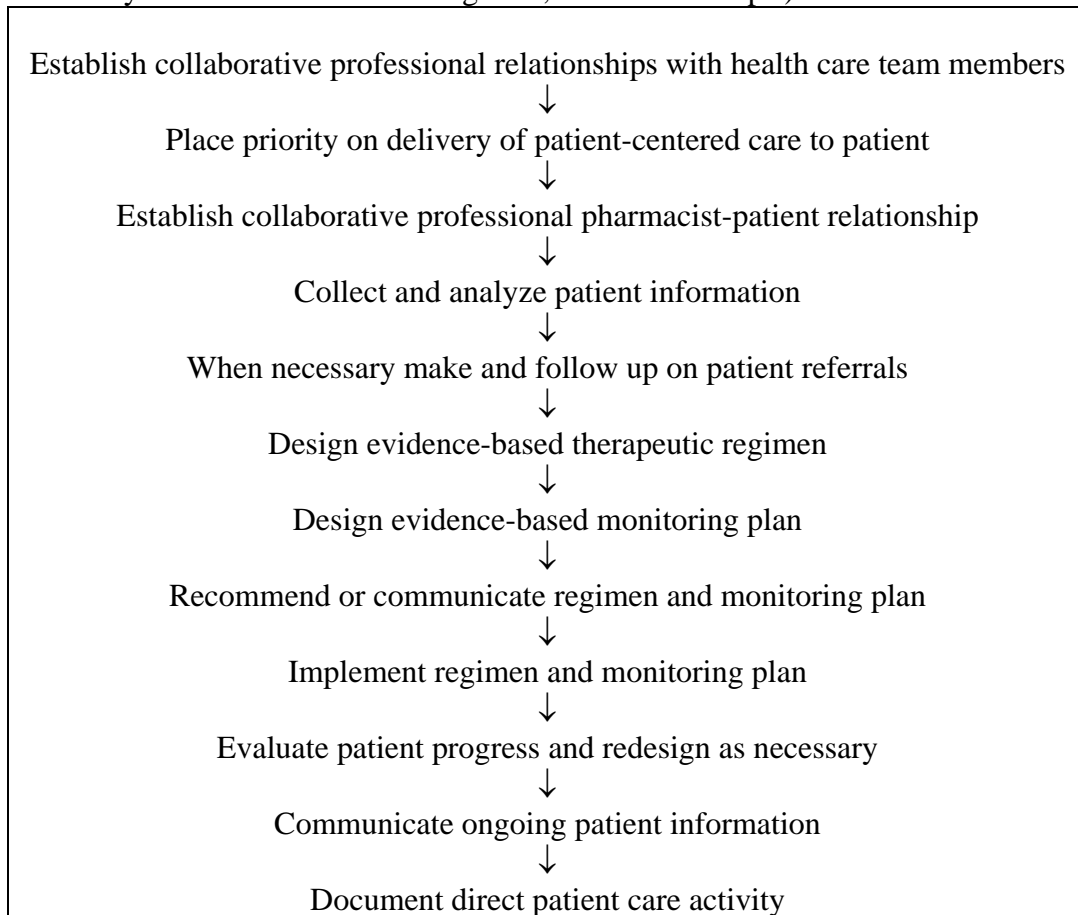

[Pharmacy Residency \(PGY1\) \[DOC\]](#) - REVISED April 2007

***Outcome R1: Manage and improve the medication-use process.***

- Goal R1.1: Identify opportunities for improvement of the organization's medication-use system.
- Goal R1.2: Design and implement quality improvement changes to the organization's medication-use system.
- Goal R1.3: Prepare and dispense medications following existing standards of practice and the organization's policies and procedures.
- Goal R1.4: Demonstrate ownership of and responsibility for the welfare of the patient by performing all necessary aspects of the medication-use system.

***Outcome R2: Provide evidence-based, patient-centered medication therapy management with interdisciplinary teams.***

(When provided as part of the practice of direct patient care, this outcome always involves a series of integrated, interrelated steps.)

- Goal R2.1: As appropriate, establish collaborative professional relationships with members of the health care team.
- Goal R2.2: Place practice priority on the delivery of patient-centered care to patients.
- Goal R2.3: As appropriate, establish collaborative professional pharmacist-patient relationships.
- Goal R2.4: Collect and analyze patient information.
- Goal R2.5: When necessary, make and follow up on patient referrals.
- Goal R2.6: Design evidence-based therapeutic regimens.
- Goal R2.7: Design evidence-based monitoring plans.
- Goal R2.8: Recommend or communicate regimens and monitoring plans.
- Goal R2.9: Implement regimens and monitoring plans.
- Goal R2.10: Evaluate patients' progress and redesign regimens and monitoring plans.
- Goal R2.11: Communicate ongoing patient information
- Goal R2.12: Document direct patient care activities appropriately.

***Outcome R3: Exercise leadership and practice management skills.***

Goal R3.1: Exhibit essential personal skills of a practice leader.

Goal R3.2: Contribute to departmental leadership and management activities.

Goal R3.3: Exercise practice leadership

***Outcome R4: Demonstrate project management skills.***

Goal R4.1: Conduct practice-related investigations using effective project management skills.

***Outcome R5: Provide medication and practice-related education/training.***

Goal R5.1 Provide effective medication and practice-related education, training, or counseling to patients, caregivers, health care professionals, and the public.

***Outcome R6: Utilize medical informatics.***

Goal R6.1: Use information technology to make decisions and reduce error.
