

PGY1 Pharmacy Residency Exemption Process

If an individual has not completed an ASHP-accredited postgraduate year one (PGY1) pharmacy residency and wants to be considered to be eligible for a PGY2 pharmacy residency position ASHP must clear the individual with the National Matching Service (NMS) to state they meet the PGY1 residency exemption process.

To be considered for exemption from a PGY1 pharmacy residency an individual **must have practiced at least THREE years as a PHARMACIST** (the equivalent of full-time employment) **and must be licensed to practice as a pharmacist in the US**. If this is the case, an individual may electronically send the following information to Janet Teeters, Director of Accreditation Services at ASHP at jteeters@ashp.org.

- CV (curriculum vitae)
- Contact information (email and phone)
- PGY2 pharmacy residency program they wish to pursue
- Copy of US pharmacy license
- A written document that addresses how their experience meets the following required outcomes and each goal per outcome (required of all individuals that complete a PGY1 pharmacy residency). Please describe the activities, projects, services provided or information that shows you meet the following goals under each of the required 6 outcomes.

PGY1 Pharmacy Residency Required Educational Outcomes and Goals

For more detailed information about outcomes, goals, objectives and instructional objectives see:

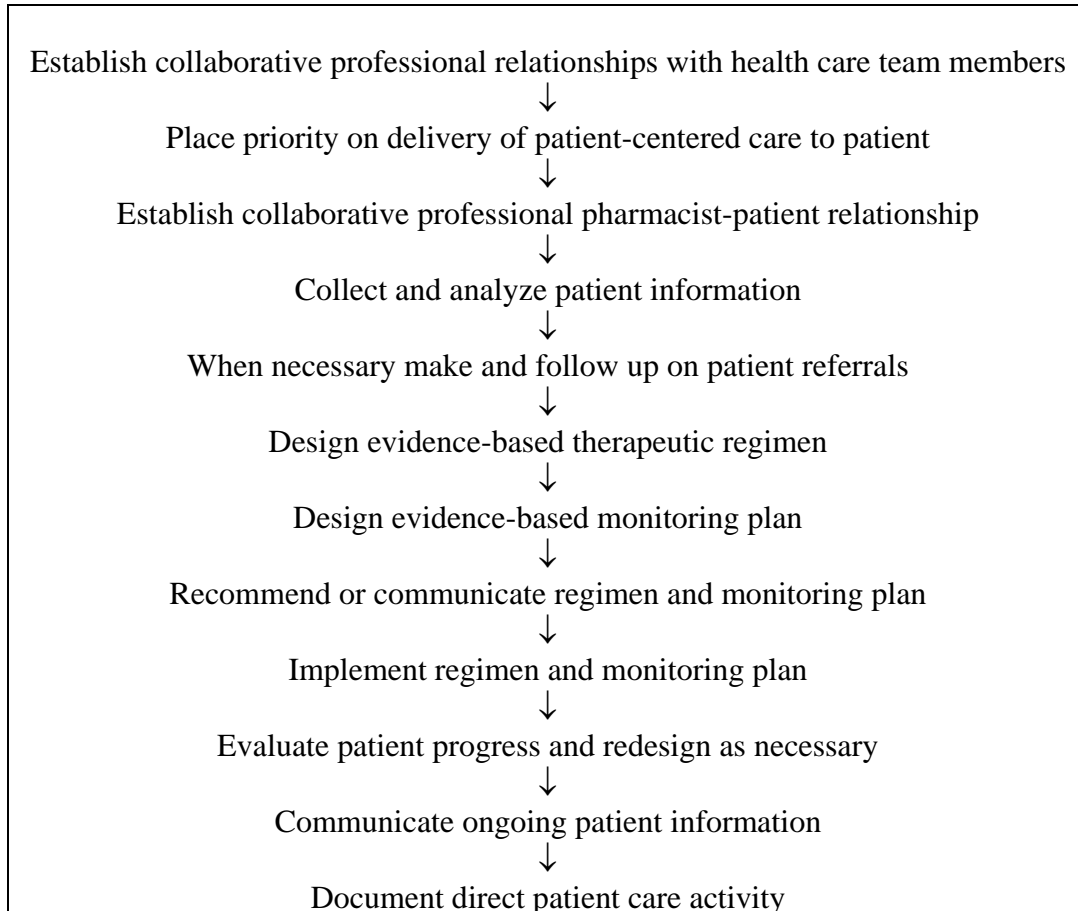

<http://www.ashp.org/DocLibrary/Accreditation/PGY1-Goals-Objectives.aspx>

Outcome R1: Manage and improve the medication-use process.

- Goal R1.1: Identify opportunities for improvement of the organization's medication-use system.
- Goal R1.2: Design and implement quality improvement changes to the organization's medication-use system.
- Goal R1.3: Prepare and dispense medications following existing standards of practice and the organization's policies and procedures.
- Goal R1.4: Demonstrate ownership of and responsibility for the welfare of the patient by performing all necessary aspects of the medication-use system.

Outcome R2: Provide evidence-based, patient-centered medication therapy management with interdisciplinary teams.

(When provided as part of the practice of direct patient care, this outcome always involves a series of integrated, interrelated steps.)

- Goal R2.1: As appropriate, establish collaborative professional relationships with members of the health care team.
- Goal R2.2: Place practice priority on the delivery of patient-centered care to patients.
- Goal R2.3: As appropriate, establish collaborative professional pharmacist-patient relationships.
- Goal R2.4: Collect and analyze patient information.
- Goal R2.5: When necessary, make and follow up on patient referrals.
- Goal R2.6: Design evidence-based therapeutic regimens.
- Goal R2.7: Design evidence-based monitoring plans.
- Goal R2.8: Recommend or communicate regimens and monitoring plans.
- Goal R2.9: Implement regimens and monitoring plans.
- Goal R2.10: Evaluate patients' progress and redesign regimens and monitoring plans.
- Goal R2.11: Communicate ongoing patient information
- Goal R2.12: Document direct patient care activities appropriately.

Outcome R3: Exercise leadership and practice management skills.

Goal R3.1: Exhibit essential personal skills of a practice leader.

Goal R3.2: Contribute to departmental leadership and management activities.

Goal R3.3: Exercise practice leadership

Outcome R4: Demonstrate project management skills.

Goal R4.1: Conduct practice-related investigations using effective project management skills.

Outcome R5: Provide medication and practice-related education/training.

Goal R5.1 Provide effective medication and practice-related education, training, or counseling to patients, caregivers, health care professionals, and the public.

Outcome R6: Utilize medical informatics.

Goal R6.1: Use information technology to make decisions and reduce error.
