**INTERN/RESIDENT REGISTRATION PROGRAM**

**Additional Programs to be Offered in the Match for Positions Beginning in 2018**

**Institution Name:__________________________**

**City:__________________________ State:__________________________**

**Institution Code Number (first 3 digits of a program's Match Code Number):__________________________**

**Name of DME:__________________________**

Provide below information on each program that your institution wishes to add to the Match that is **not** already included in the NMS Match System. For each program, you must provide the program type, the number of positions to be offered in the Match, and the appropriate AOA Code Number(s), as described below. The 5-digit Match Code Number will be assigned to each program by NMS.

Please sign and date this form and return it to NMS as soon as possible by scanned e-mail attachment to aoairp@natmatch.com or by fax to 844-977-0555. Forms received at NMS after the deadline for submitting Rank Order Lists will not be accepted.

**AOA Code Numbers:** The 6-digit AOA Internship and Residency Code Numbers requested below are required to identify the AOA-accredited internship and/or residency program(s) that constitute each program in the Match. They are for internal validation and reporting purposes only, and should not be communicated to applicants. **Only the 5-digit Match Code Number assigned by NMS to each program will be used on applicant Rank Order Lists for purposes of the Match.** You must provide below the following AOA Code Numbers for each program:

- For a traditional rotating internship: the AOA Internship Code Number only
- For an Option 1 specialty residency: the AOA Residency Code Number only
- For an Option 2 specialty residency: both the AOA Internship Code Number for the affiliated OGME-1 Preliminary position(s) and the AOA Residency Code Number for the residency position(s) that start training in OGME-2
- For an OGME-2 Dermatology and Preventive Medicine-Public Health residency: the AOA Residency Code Number only

If you do not know the 6-digit AOA Internship Code Number or 6-digit AOA Residency Code Number, you should obtain this information from the AOA Opportunities database (opportunities.osteopathic.org), or directly from the AOA.

**Note:** For Option 2 specialty residencies, if the internship and residency positions are in different institutions, this form must be completed and submitted by the institution that offers the residency positions; however, you must also provide the name of the institution where the OGME-1 Preliminary position(s) are located and the correct AOA Internship Code Number for that institution.

**Please note:** Since the Match places applicants into positions for training in 2018, the number of positions to be listed in the Match for a residency program is the number of positions to start training in 2018 only **(not the total number of approved positions in all years of training in the residency).** For example, an Option 1 residency program that involves 3 years of training and is approved for a total of 12 positions, may only wish to recruit 4 students to start training in 2018; in this case, the number of available positions to be listed in the Match by this program will be 4 (not 12).
